Premium Generator Enhancements

December 2006

Introduction

Premium Generator is our highly successful and innovative on-line quotation system.

It has simplified the process of marine insurance for the past three years.

Intermediaries can quote and bind a broad range of cargo and transit policies 24/7.

We regularly review the performance of Premium Generator and seek feedback from users on an ongoing basis.

Consequently, we have made changes to:

- Product rating and minimum premiums
- Household Removal sums insured

These changes are effective Thursday, 30 November 2006.

Disclaimer

This newsletter is for information purposes only.

Rate Changes

We are pleased to announce that rates have been reduced on

- Single Transit Australia
- Annual Australia
- Single Transit Import/Export
- Annual Import/Export

Minimum premiums have also been reduced to \$300 for annual policies and \$200 for Single Transit Import/Export.

Household Removals

In the past, Premium Generator has required a breakdown of the different types of items to be insured eg: furniture, whitegoods, clothing etc.

As this information is not always available, it will now be possible to enter a Total Sum Insured only.

These changes ensure that our already competitive products continue to give you and your clients excellent value for money.

Further changes are in the pipeline to be announced early next year.

Information

Premium Generator is easy to use. It saves you time and money and is designed to help you meet your compliance commitments.

- Obtain cargo, transit and Carriers' Goodwill quotes
- View cover benefits
- Vary excess options
- Email, print and save quotes and cover-notes

Further information on Premium Generator and other services and products that we offer can be found on our updated website
